PALAU COMMUNITY ACTION AGENCY 1979-1980 CENSUS

Tables and Charts printed in short version of Census. All other Tables and Charts in long version.

INTRODUCTION

Introduction and Definition of Terms

SIZE AND DISTRIBUTION OF RESIDENT POPULATION

*Table 1: Households and Resident Population by Sex and by State, separate for Palauans and non-Palauans.

*Charts: Resident Population by State and Sex.
Resident Palauan Population by State and Sex.

*Table 2: Density of Population by State.

SEX AND AGE COMPOSITION

*Table 3: Resident Population by Sex, State, and Single Year of Age.

*Age/Sex Pyramid of All Persons Resident in Palau: Male and Female Population by 5-year Age Groups, Number and %.

*Age/Sex Pyramid of Palauans Resident in Palau: Male and Female Population by 5-year Age Groups, Number and %.

*Age/Sex Pyramids of All Persons Resident by States (hamlets in Koror): Male and Female Population by 5-year Age Groups, Number and %.

*Charts: Palau Residents by Sex and Age Group.

*Table 4: Resident Population by State and Hamlet by Sex and 5-Year Age Group, separate for Palauans and non-Palauans.

SOCIAL CHARACTERISTICS

Education

*Table 5: Resident Population Aged 4-30 Years by State and Sex According to Single Year of Age and School Attendance.

*Table 6: Resident Population Aged 4-30 Years by State, Sex, School Attendance, and Level of Education.

*Table 7: Resident Population of Koror State Aged 4-25 Years and Attending Elementary School, by Age, Sex, and Grade.

*Table 8: Resident Population of Koror State Aged 12-30 Years and Attending High School, by Age, Sex, and Grade.

*Table 9: Resident Population of Koror State Aged 12 Years and Over and Not Attending School, College, or Other Post-Secondary Training, by Sex, Age Group, and Educational Attainment.

Health Characteristics

*Table 10: Population with Reported Illness, by Sex, Age Group, and Type of Illness.

Households

*Table 11: Resident Population by State and Size of Household.

*Charts: Density of Household, Koror, Other States, Comparison Koror/Other States, All States.

*Table 12: Resident Population in Households by Household Types and Relationship to Head of Household.

ECONOMIC CHARACTERISTICS

Economic Analyses: 1973 Census Definition

Economic Activity

Table 13a: Resident Population by State Aged 15 Years and Over According to State, Sex, Age Group, and Economic Activity. (1973 Definition)

Charts: Palau Residents by Economic Activity and Sex, Koror and Rural.

Table 14a: Resident Population of Palau Aged 15 Years and Over and Employed in the Monetary Economy According to State, Sex, Age Group, separate for Palauans and non-Palauans. (1973 Definition.)

Charts: Palau Residents, Monetary Economy by Economic Activity and Sex, Koror and Rural.

Table 15a: Resident Population of Palau Aged 15 Years and Over and Employed in the Village Economy According to State, Sex, Age Group, and Economic Activity. (1973 Definition.)

Charts: Palau Residents, Village Economy by Type and Sex, Koror and Rural.

Table 16a: Resident Population of Palau Aged 15 Years and Over and not Economically Active, by State, Sex, Age Group, and Category (1973 Definition.)

Charts: Palau Residents, Not Economically Active, by Category and Sex, Koror and Rural.

Economic Activity and Educational Level

Table 17a: Resident Population of Koror State Aged 15 Years and Over and Not Attending School, College, or Post-Secondary Training According to Sex, Economic Activity, and Educational Attainment. (1973 Definition)

Charts: Koror Residents by Education, Economic Activity, and Sex.

Occupation

*Charts: Palau Residents, Comparison of Statistics of 1973 and 1980 Censuses by Age Group and Sex.

Table 45: Resident Population of Palau, 1980, Comparison of PCAA and U.S.T.T.P.I. Censuses by Sex, Age Group and Urban/Rural Designation.

INTRODUCTION

In 1979 the Palau Community Action Agency undertook a needs assessment to help provide itself with information for its use in planning community programs. The needs assessment included a population survey. It was felt that previous census materials were out of date due to the rapidly changing population structure of Palau, and in any case were not broken down on the community/hamlet level needed for social service program planning. Originally the survey was intended to cover only the rural areas outside Koror. Once these surveys were completed it was decided to include Koror as well. The Koror census forms were amended to include more information than collected outside Koror.

The survey outside Koror was conducted in a period from July to November, 1979. The Koror survey was conducted during January 1980. Because of the time lapse, the entire staff of PCAA made special efforts to review the survey materials to ensure that individuals were not double counted both within and outside Koror and that all those individuals listed as migrated to Koror from other communities were identified and located.

The staff of the Palau Community Action Agency worked together to develop the survey questionnaire and to formulate its questions. Particular attention was given to the wording and communication of the question concerning occupation. In a previous sample survey by the Agency the public had listed only salaried positions as occupations, and those involved in local production (often in the monetary economy) listed themselves as unemployed. Thus every effort was made to identify individuals involved in fishing, farming, animal husbandry, and other local production activities (although this was not entirely successful). There was also an attempt to identify those seeking employment rather than simply not working (again not totally successful).

The population survey was conducted by teams of PCAA staff (including Koror Municipal Office Staff in Koror) after receiving permission and support for the survey from the magistrates and chiefs of each of the communities. Initial information from the survey was presented back to the communities in community meetings and used as a basis for discussion on the development of community programs.

PCAA staff worked from aerial maps of the communities to help identify households. Staff included Community Organizers representing their areas to PCAA with intimate knowledge of their communities. Community boundaries were based on local conceptions of community, and originally the survey included community designations traditionally recognized but not reflected in the contemporary political structures (i.e. Ngerbodl in Koror). At the time of the analysis these communities were integrated into their respective hamlets and communities as presented constituted.

A great deal of effort was made by PCAA staff to ensure the accuracy of the population survey. All forms were checked by the Survey Coordinator, Mr. Maidesil Rechuld. One community was resurveyed when it became apparent that the data were incomplete.

The forms were also checked by the director, Katharine Kesolei, and researcher, Karen Nero. At the completion of the survey the entire staff rechecked the forms to ensure that no double or triple counting had occurred.

Special efforts were made to include information on household members currently residing outside their household, either within Palau or abroad. These data are more accurate for younger members of the population in school or residing abroad who have not yet established their own households. Special efforts were made to include students living in other households while attending school in Koror. Individuals were counted by place of residence, not place of origin, including students (consistent with the 1973 U.S.T.T.P.I. Census tabulation policy for high school students, but contrasting with the 1980 U.S.T.T.P.I. Census which counted high school students at their home of origin).

The PCRA population census was analyzed at the Qualitative Anthropology Laboratory of the Department of Anthropology, University of California Berkeley with the support and assistance of Dr. Eugene Hammel and programming assistance of Allen Sonafrank.

DEFINITIONS AND EXPLANATIONS

The definitions given below are in abbreviated form. Additional information may be obtained from the Code Book of the Census and from PCRA staff.

Age - Age of all household members were asked of the household member completing the survey. A Japanese calendar of conversion dates was used to assist those born during the Japanese Administration. Where an exact age was unknown an estimate was made by the household member or PCRA staff.

Dormitory

- Originally the dormitories of MOC, Emmaus, Bethania, and the SDA schools were not surveyed. Information on residents was provided by parents and relatives. Since many students were missed the Palau Planning Office provided information by sex and 5-year age groups to address this undercount. Single year of age and nationality are not available for students added through this method. Thus the dormitory counts include:

Koror:	14 yr.	male,	47 students	10-14 yr.
Koror:	15 yr.	male,	10 students	15-19 yr.
Koror:	19 yr.	male,	107 students	15-19 yr.
Koror:	19 yr.	female,	24 students	15-19 yr.
Koror:	20 yr.	male,	68 students	20-24 yr.
Koror:	20 yr.	female,	8 students	20-24 yr.
Koror:	25 yr.	male,	4 students	25-29 yr.
Koror:	30 yr.	male,	2 students	30-34 yr.
Ngaraard:	14 yr.	female,	20 students	10-14 yr.
Ngaraard:	15 yr.	female,	55 students	15-19 yr.
Airai:	14 yr.	male,	11 students	10-14 yr.
Airai:	14 yr.	female,	4 students	10-14 yr.
Airai:	15 yr.	male,	31 students	15-19 yr.
Airai:	15 yr.	female,	13 students	15-19 yr.
Airai:	20 yr.	male,	3 students	20-24 yr.

Names, Spelling

- Palau is used rather than Republic of Palau since the population census preceeded the establishment of the Republic of Palau. Place names are the official English state/hamlet names with the spelling taken from the 1983 Abstract of Statistics published by the Republic of Palau.

Nationality

- Nationality refers to place of origin. Palauans holding U.S. citizenship were counted as Palauans.

Population

- Population includes those actually present according to their place of normal residence. Where available it includes household members residing outside the household either within Palau or outside.

Economic Analysis:

1973 Definition - In an effort to provide comparability with the 1973 Census, a set of economic table (with Table * A designation) were prepared according to the 1973 definitions of the economy. These definitions include a contrast between monetary and village economies and includes homemakers as economically not active. Occupational types and categories and their organization also vary from the approach used by PCAA. No sector designations were included, but in the analysis were inferred from workplace using 1973 occupational categories.

Alternate Definition

PCAA Definition - PCAA attempted to formulate occupational types and categories based on the reported occupations. Information was collected on workplace which were used to develop sector analysis. These occupations differ significantly from the 1973 definitions in that all those engaged in productive occupations were included as economically active. Farmers, fishermen, unpaid family workers including homemakers are listed under "unpaid contributions to the economy". There is no distinction between "monetary" and "village" economy since these are so intertwined in Palau. Tables prepared with this approach are designated Table # B.

Economic Activity:

- Employer: head of a private business employing one or more persons.
- Self-employed: person working independently.
- Wage Earner, Government: individual employed by the Trust Territory of the Pacific Islands or by a local government or in U. S. Government Programs.
- Wage Earner, Private: individual employed by any business or cooperative.
- Unpaid family member: individual working in family business
- Other: miscellaneous work not included above.

Occupation - Occupation is that reported.

Income - Reported income. An effort was made to avoid under-reporting, but figures cannot be be considered totally accurate.

Education - Highest education attained. (3 Years of Japanese Elementary was tabulated as Elementary 5th grade level. 5 Years of Japanese Elementary was tabulated as Elementary 7th grade level.

Family Unit - Family relationships listed reflect cultural, not biological definitions. An adopted grandchild might be listed as a child.

Households - Private household includes culturally defined units of family members residing together. Related or unrelated individuals residing with the family are listed (within Koror only) as subsidiary household members.
- Group households include dormitories, the prison, and the hospital. No attempt was made to census hotel residents.

N.S. - Not specified.
